

# CELOX™ PPH

UTERINE HAEMOSTATIC TAMPONADE

Demonstrates  
**77.8%**  
reduction in  
hysterectomies  
vs standard  
of care<sup>1,2</sup>

## FAST ACTING

Unique mode of action reducing the need for further surgical therapy<sup>2</sup>

- Addresses **wide range** of uterine post-partum haemorrhage indications<sup>2,3</sup>
- **Rapid haemostasis** delivered independently of the patients own clotting mechanism<sup>4</sup>
- Bleeding control highly effective with compromised patients on anticoagulant therapy or trauma induced coagulopathy<sup>4</sup>

## SAFE & CLINICALLY EFFECTIVE

10 years of clinical efficacy vs standard of care<sup>1,2,3,5,6</sup>

- **100% haemostasis for grade 1 & 2 bleeding** (up to 2500mls) in all deliveries<sup>2</sup>
- 95.6% haemostasis for grade 1 to 3 bleeding (up to 8000mls) for vaginal deliveries<sup>2</sup>
- 77.8% reduction in hysterectomies vs current standard of care<sup>1,2</sup>
- Safe and clinical effective supported by a range of peer reviewed published clinical papers<sup>1,2,3,5,6</sup>

## VERSATILE & EASY TO USE

Allowing globalisation of the technology in Developed and Developing Nations

- Light weight product that's **simple and quick** to apply and remove<sup>1,2,3,5,6</sup>
- Limited training required due to product simplicity and alignment with standard uterine packing technique<sup>3,5</sup>
- Robust product design with **5 year** shelf life. **No special storage requirements** (wide temperature extremes) and **no additional** preparatory steps or need for additional materials or power.
